Art. Unit: 3662

1. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On lines 4-6 of independent claim 1, the language is mis-descriptive of the disclosed invention in that as Applicant has argued on the lower half of page three of the Amendment submitted by Applicant on 25 September 2002 the "beam fields are not all active at the same time," but the use of the phrase "at least two" on line 5 of claim 1 would include the case where all three beam fields are active. That is to say, the "at least two" phrase in claim 1 as written with "at least three" transmitting and receiving devices leaves open the case of all of the transmitting and receiving devices being active, which is contradicted by the Specification as argued by Applicant in the 25 September 2002 response as discussed above.

Dependent claims 2-5 are unclear in that they depend from unclear independent claim 1.
